

Application Serial No. 10/578,292  
Reply to Office Action of October 10, 2007

PATENT  
Docket: CU-4797

### REMARKS

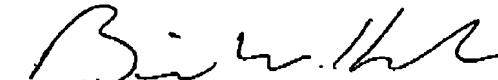

In the Office Action, dated October 10, 2007, the Examiner states that Claims 10-25 are pending, and Claims 10-25 are rejected. By the present Amendment, Applicant amends the claims.

In the Office Action, the specification is objected to for various errors that seem to be caused by a scanned/OCR version of the specification. The Applicant has reviewed their version of the specification that was submitted, and the PDF scanned version that is available on PAIR, and the errors that the objection complains about do not occur in either of these two versions. The Applicant has not located the scanned/OCR version of the specification that the Examiner has reviewed. It is suggested that the Examiner refer to the version available on PAIR which is an accurate copy of the specification that was actually filed.

Claim 11 is objected to for a minor error which did occur when the preliminary amendment was filed. Correction of that error is made by this amendment.

In light of the foregoing response, all the outstanding objections and rejections are considered overcome. Applicant respectfully submits that this application should now be in condition for allowance and respectfully requests favorable consideration.

Respectfully submitted,

November 8, 2007
